

A-T CHILDREN'S PROJECT PRESENTS
A BIOPHARMA LEADERSHIP BALL

ILLUMINATION

SATURDAY, SEPTEMBER 26, 2026

THE MUSEUM OF FINE ARTS, BOSTON

Join biotech founders, pharma executives and healthcare investors for a magical evening of celebration and hope for families of children with ataxia-telangiectasia (A-T).

[ATCP.ORG/BALL](https://atcp.org/ball)

Ataxia-telangiectasia (A-T) is a genetic disease that causes loss of muscle control and balance, cancer, lung disease and immune system problems in children and young adults, shortening their lives. The nonprofit A-T Children's Project partners with academic and industry investigators worldwide - organizing and supporting innovative research, conferences, clinical teams, data platforms and biomarker development - to optimize disease management strategies, develop new treatments and find a cure.
